

# eLearning to Work Safe

On-demand, cost effective training is just one of the key strengths of our eLearning. Worldwide-anytime access ensures learning, training and assessment can be conducted at a time and location that suits the company and the individual.

Studies have shown that while learners remember just 20% of what they see OR hear; and just 40% of what they see AND hear; they remember 70% of what they see, hear and interact with.

Our approach is focused on delivering eLearning that engages and stimulates learners, and provides them with the practical knowledge and skills they need to improve their safety awareness in the workplace.
